INTEGRATED QUALITY AND ENVIRONMENTAL POLICY

The Management of O.F.S. S.r.l. is committed to ensuring the continuous improvement of the performance related to its products and services in terms of quality and environmental impact. To achieve this, it relies on highly skilled design and operational personnel, as well as proven suppliers known for their high quality and efficiency, in order to provide Clients with valuable products, superior in quality, and at competitive prices.

APPLICATION METHODS

The Company Policy is carried out through an Integrated Management System for Quality and Environment (IMS), compliant with UNI EN ISO 9001:2015 and 14001:2015 standards, specifically:

1. We have integrated the QMS and EMS into the IMS, including the necessary actions for risk and opportunity assessment, to fully leverage all tools for continuous improvement.
2. In addition to the requirements of ISO 9001:2015, ISO 14001, and applicable legal obligations, it is our policy to strictly comply with all technical requirements established by the standards governing our products.
3. We annually plan continuous improvement objectives, through process indicators, in line with our competitive levers and specific capabilities, to maintain the efficiency of our IMS and enhance customer satisfaction.
4. We annually review the effectiveness and efficiency of our IMS and the suitability of our policy, and we take appropriate actions to correct non-optimal situations and/or eliminate or reduce risks and seize opportunities.
5. To support this policy, we engage our staff through communication, training, and education tools to ensure active and informed commitment from all for the proper functioning of the IMS and the achievement of objectives.
6. We implement programs aimed at reducing energy and raw material consumption, controlling environmental pollution, and minimizing the environmental impacts resulting from our activities.
7. We adopt measures for the prevention of incidents with environmental impact and promptly remedy any damage caused to the environment by the organization’s activities, products, and services.
8. We ensure that every collaborator is aware, responsible, and involved in efforts toward the continuous improvement of the quality of our products and the environmental aspects related to the company's activities, while also providing adequate training.
9. We select our suppliers based on their quality and environmental performance.
10. We raise awareness among suppliers and contractors about the principles of our policy.
11. We understand that grasping both the implicit and explicit requirements of our Clients is essential to truly satisfy them, thereby increasing and retaining our customer base.
12. We systematically monitor significant environmental impacts to keep them under control within the prescribed limits
13. We plan quality and environmental objectives and their related targets, implementing appropriate programs.
14. We manage waste by prioritizing recovery and recycling activities over disposal.
15. For continuous improvement, we implement appropriate control and audit methodologies for our integrated management system.
16. We coordinate the policy and activities of the IMS with prevention and protection activities.
17. We apply the Life Cycle Perspective (LCP) correctly and effectively to assess the environmental aspects associated with the company’s products and services.
18. We are aware and responsible for the nature, scale, and environmental impacts of our activities, products, and services, and therefore, we pay attention to new technologies available that aim to reduce the consumption of raw materials, energy, and natural resources, while specifically minimizing waste and emissions.
